## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-4 and 12-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:
  - a) Claim 1 requires the measuring unit to be operable to also "judge the type of sample solution on the basis of an oxidation current value obtained between the third electrode and the counter electrode to between the third electrode and the working electrode." The measuring unit of Ikeda is not operable to perform this function. In addition to measuring the contents of the substance to be measured the measuring unit of Ikeda is operable to detect a liquid junction (abstract), which may indicate whether sufficient sample has entered the biosensor (col. 5:58-67);
  - b) Claims 2-4 depend from allowable claim 1;
  - c) Claim 12 requires the step of "judging the type of sample solution on the basis of an oxidation current value obtained between the third electrode and the counter electrode or between the third electrode and the working electrode." The measuring unit of Ikeda is not operable to perform this step. In addition to measuring the contents of the substance

to be measured the measuring unit of Ikeda is operable to detect a liquid junction (abstract), which may indicate whether sufficient sample has entered the biosensor (col. 5:58-67);

d) Claims 13-18 depend from allowable claim 12; and

e) the "X" references cited on the Supplementary European Partial Search Report for Application no. EP 01946936 were only cited as relevant to claim 5, which was cancelled by Applicant in the amendment of October 12, 2004. Furthermore, independent claims 1 and 12 are distinguished from previous claim 5 for at least the reason cited above for allowability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
